

GUMMIE SORTING & COUNTING SYSTEM

- * FAST AND ACCURATE COUNTING
- * EASY CLEANING AND CHANGE-OVER
- * SIMPLE OPERATION AND MAINTENANCE
- * SMALL FOOTPRINT

The VMek Abacus+ Count Batching + Inspection system is a robust THC-infused and CBD gummie sorting and counting solution specifically designed to integrate with Horizontal Form Fill and Seal (HFFS) and Vertical Form Fill and Seal (VFFS) pre-made pouch bagging machines, and rigid container handling systems for the cannabis packaging industry.

Validate

- * Each part is validated prior to counting
- * 360° inspection is performed on all parts
- * All parts are validated by size and color
- * Improper parts are tracked for downstream handling

Count

- * Parts are divided by programmed target
- * Batch counts are divided by programmed target
- * High speed ejectors and diverts are used to group the parts for proper packaging
- * Parts collected tightly for a compact load or strung out for easy filing
- * Optional timing hopper available

Verify

- * All counts are verified for accurate packing
- * Final inspection is performed to verify proper diverting
- * Parts moved to position A are actively verified
- * Parts moved to position Bare passively verified
- * Verification guaranties target count is reached

Reporting

- * A quality score is created for each batch
- * The data is displayed for on screen monitoring for efficient system operation
- * The data can also be streamed to the customer's control system

Packaging Specs

- * Part Size: 3mm to 35mm" cube
- * Part Speed: Up to 600 PPS*
- * Pack Speed: Up to 120 PPM*
- * *Speeds for two chute machine

Requirements

- * Power: 115/230 VAC, 50/60 Hz
- * Air: 90 PSI@5 CFM
- * Temperature: 113°F / 45°C (max.)
