

CANNABIS FLOWER PACKAGING SYSTEM

The Dura-Pack low profile cannabis packaging system enables organizations to scale their cannabis packaging operations and package cannabis 3-4 times faster than hand packing. With the integrated high-performance multi-head combination scale, fragile flower handling design and an industry-leading scale accuracy of 0.01g, the Dura-Pack low profile cannabis packaging system leaves a small footprint and ensures that your cannabis products will be packaged efficiently, accurately and will dramatically increase your cannabis packaging production.

SYSTEM SPECIFICATIONS

- 14 Individual weigh heads offer optimum speeds and weighing accuracy at low target weights.
- Scale Resolution: 0.02g
- Set target weights with 0.01g accuracy (E.g. 1.00g, 3.50g, 7.00g & 28.35g)
